Ashim John

Entry-Level Cybersecurity & Cyber Risk Analyst

Albany, NY | linkedin.com/in/johnashim | github.com/ashimcode

Cybersecurity student connecting network defense, cyber risk, and hands-on technical operations.

EDUCATION & CREDENTIALS

B.S. in Cybersecurity (Defensive), combined 4+1 B.S./M.S. program - University at Albany, SUNY.

Currently in the undergraduate portion; expected B.S. completion May 2027.

Coursework: Information Security Business; Cybersecurity Policy & Management; Networks & Systems; Database Fundamentals & Security Practices; Information Security Assurance

Credentials & honors: C-Tech Copper; C-Tech Fiber Optics; C-Tech Coaxial Cabling; C-Tech Grounding and Bonding; C-Tech Ethernet; National Technical Honors Society

EXPERIENCE & LEADERSHIP

Graduate Secretary | ASIS&T UAlbany Chapter

Sep 2026-Present

Prepare E-Board minutes, track attendance, and organize shared records and handoff materials using Google Forms, Google Drive, Microsoft Teams, and SharePoint.

Contract AI Evaluator | Handshake AI

2026-Present

Evaluate AI responses, applications, and multimedia against correctness, instruction-following, usability, and visual-quality rubrics. Record evidence-based ratings and annotate model-training data.

CEHC Makerspace Intern | University at Albany

Jan 2026-May 2026

Operated 3D printers and Cricut Makers; supported hardware prototyping, soldering, electronic repair, and student troubleshooting.

Drone & Robotics Intern | University at Albany

Sep 2025-Dec 2025

Troubleshot mechanical, electrical, and software anomalies; conducted physical security assessments and maintained repair and test logs.

Attractions Attendant | Apex Entertainment

2024-Present

Operate escape rooms, sports simulators, POS systems, and facility safety protocols.

Event Ambassador & Administrative Work-Study | University at Albany (CEHC)

Sep 2023-Present

Guide university lab tours, coordinate Dean's List awards, and manage authorized facility access under security protocols.

Ashim John / Selected evidence

SECURITY OPERATIONS PROJECT

Enterprise Home SOC & Elastic SIEM Lab

In progress · source verified

Create a controlled home SOC environment for endpoint telemetry, safe simulations, and investigation reporting.

Documented a proposed VMware / Windows / Ubuntu architecture with Docker services for Elastic, Kibana, OpenClaw, and Graphiti. Supporting Docker, Graphiti, and Splunk services are available.

Architecture documented and a sanitized synthetic event accepted by Splunk HEC. Dedicated Windows/Sysmon telemetry and end-to-end investigation remain unverified.

Architecture diagram shows the proposed path. It does not indicate completed Windows/Sysmon ingestion.

https://github.com/ashimcode/cybr-projects

NETWORK INFRASTRUCTURE

C-Tech credentials cover copper, fiber optics, coaxial cabling, grounding and bonding, and Ethernet.

Credential evidence supports cabling knowledge; it does not establish a completed hardening deployment.

ADDITIONAL OPERATIONS EXPERIENCE

Urban Air · Walgreens · Jacob A. Riis Settlement | 2022-2024

Supported attractions safety, retail and POS operations, and supervised youth activities.

EVIDENCE BOUNDARIES

Project descriptions distinguish documented work from proposed architecture. Research and Atlas completion claims await supporting evidence and are not included as completed achievements.
